**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2, 6, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Parker et al, 5,599,423, as set forth in the previous Office action.

***Allowable Subject Matter***

3. Claims 3-5, 7-14, and 17-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 25-29 are allowed. Please refer to the previous Office action for a statement of reasons for allowance.

***Response to Arguments***

5. Applicant's arguments filed 15 November 2006 have been fully considered but they are not persuasive. Applicant argues that Parker does not disclose or fairly teach obtaining one or more characteristics of a structure on a substrate, claim 6, or a chip, claim 16. The examiner disagrees. Parker, column 1, lines 15-20, states that polishing is done as certain stages in the fabrication of devices on a substrate. Parker's method simulates, and optimizes the polishing process based on a characteristic (which would include material or layer thickness) of a structure (device) on the substrate. A chip is a

device on a substrate. As the simulator calculates polishing results that indicate the amount of material removal, (column 2, lines 48-50) and as the desired amount of material removal must be predetermined to prevent over-processing of the work piece, it is the examiner's position that without further limitations to device the structure or chip, Parker discloses the claimed invention.

### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
